This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

When the **latter** is used, the p giving the receipt must sign his name or initials as to mark the stamp and so prevent the **possibility** of its being again **used.**

Any note, **memorandum**, payment of wages money paid on acc writing given of **payment** of money signifying a **discharged** accou that money has been paid or credit given, as well as all **entries** mad parties receiving moneys in **pass** books kept by the parties paying the s sales by **auction**, receipts, discharges, or acknowledgments given upon ments made by or with bills, drafts, notes, or other securities, where amount is Forty Shillings or upwards—are to be receipts liable *to the S* *Duty of One* Penny.

NECESSARY CAUTIONS TO AVOID PENALTIES.

Any party giving a receipt for any sum above Forty Shillings without stamp is liable to a penalty of Ten Pounds.

Any party endeavouring by contrivance or device to insert a less than Forty Shillings in the receipt when more has been paid, is liable penalty of Fifty Pounds.

A party refusing to give a receipt stamp incurs a penalty of Ten Pou

No receipted bill of parcels is of any value to the purchaser, or a valid, unless the stamp is printed on it or affixed to the same.

No receipt can be made valid by afterwards affixing a stamp.

REMITTANCES, BY THE POST, &c.

The acknowledgment of any bills of exchange, bank notes, or other missory notes, or other securities for money, is exempt from receipt d but if the receipt of money be acknowledged a stamp is necessary.

The exemption is confined to the mere acknowledgment of the *arrival* of such bills of exchange, bank notes, or other promissory n or securities. It is not intended to give to the letter the effect of a charge for money, but simply to authorize the receiver of the securitie convey to the sender the information that they have reached the ha of the person intended. If, therefore, the letter of acknowledgment tain any intimation relating to the appropriation of the money represe by the securities, by signifying that credit has been given for the a no or that it has been placed to account, it is no longer covered by the emption, but becomes a receipt chargeable with stamp duty. Inst however, of enclosing a separate formal receipt in any such case, it only be requisite to affix an adhesive stamp to the letter of acknowledgm at the same time cancelling it by writing the initials or a portion of signature to the letter upon it. The documents, the safe arrival of wh may thus be acknowledged by post without a receipt stamp, are bank bills, Bank of England and country bank notes, letters of credit, pos orders, cheques (stamped or unstamped), bills, drafts, and orders for ment of money of every description, whether due or not.

Where advice is given by letter to a person that money has been p his credit, a letter in return, merely acknowledging the receipt of the containing such advice, is not chargeable as a receipt; but any let *that the money* has been received is liable.

RULES FOR CALCULATING INTERES

Without the use of Tables.

In business, Interest is reckoned on Pounds only. If the pri cipal consists of £ *s.* and *d.*, the nearest pound is taken. Thu Interest on £56 14*s.* 6*d.* would be reckoned as on £57; but c £56 4*s.* 6*d.* as on £56. But as the Interest on the exact sum often required, the following rules are applicable to all amounts :-

5 per Cent for Years.

5 per Cent. is 1*s.* in the pound for a year; therefore reckonin the pounds in the principal as shillings, gives the Interest for or year; multiply that by the number of years. If there are shillin and pence, reckon 6*d.* for 10*s.*, and ½*d.* for each 10*d.*; or find, page 260 of this book, how much is 5 per Cent. on the shillin and pence; in either case, multiply by the number of years, an add the product to the Interest for the pounds.

5 per Cent. for Months.

5 per Cent. Interest on £1 is one penny per month; therefor multiplying the pounds by number of months, gives the I terest in pence. If there are shillings and pence, multiply the by the months, and for each £ take 1*d.*, for 10*s.* take ½*d.*, and fo 5*s.* a farthing.

5 per Cent. for Days.

Multiply ½rd the principal by the days; or the principal by ½ th days; or the principal by the days, and divide by 3; whichever ma be the most convenient. In either case, from the product cut o the unit figure, and reckon the other figures as pence. This give rather more than the correct Interest; deduct 1-73rd, or 1*d.* in eac 6*s.* 1*d.*, or 3½*d.* in the pound.

General Rule for finding Interest at all othe Rates, for Years, Months, or Days.

Multiply the principal by twice the rate, and divide by 10; wit the new principal thus formed proceed in every case the same a for 5 per Cent. For 3½ per Cent., multiply the principal by 2, an divide the product by 3. For 2½ per Cent., it would be quicker t take half the principal; for 4½, to subtract from the principal $\frac{1}{10}$t of it; for 6 per Cent., to add to the principal ½th of it.

If a book of "Tables of Interest at 5 per Cent." is used, tak out the Interest at the 5 per Cent., and treat it in the same way multiplying it by twice the rate, and dividing by 10.

To Calculate Commission, or Discount, or In terest for One Year at any Rate per Cent.

Multiply the amount by twice the rate; in the product, call th *unit figure* of the pounds, pence; the other figures reckon a *shillings*; add 1*d.* if the unit figure is more than 4; add anothe 1*d.* if the shillings and pence in the product are more than 5*s.*,

WEIGHTS AND MEASURES.

Troy Weight.

By this weight Gold, Silver, Platina, and precious stones, except Diamonds, are estimated.

20 Mites ..... 1 Grain	20 Pennywts ... 1 Ounce
24 Grains..... 1 Pennywt.	12 Ounces ..... 1 Pound

The Bank of England and many bullion dealers now use only the *ounce* and *decimals* of an ounce.

Any quantity of Gold is supposed to be divided into 24 parts, called *Carats*. If pure, it is said to be 24 Carats fine; if there be 22 parts of pure gold and 2 parts of alloy, it is said to be 22 Carats fine; this is the standard for gold coin, and is worth £3 17s. 10½d. per ounce Troy. What is called the *new standard*, used for watch cases, &c., is 18 Carats fine. The term Carat is also applied to a weight of 3¼ grains Troy, used in weighing diamonds; it is divided into 4 parts called *grains*; 4 grains Troy are thus equal to 5 grains diamond weight.

Apothecaries Weight.

USED IN MEDICAL PRESCRIPTIONS.

The Pound and Ounce of this weight are the same as the Pound and Ounce Troy, but differently divided.

20 Grains Troy... 1 Scruple ℈	8 Drachms . 1 Ounce (Troy) ℥
3 Scruples ..... 1 Drachm ʒ	12 Ounces ... 1 Pound (Troy) ℔

Druggists *buy* their goods by Avoirdupois Weight.

Avoirdupois Weight.

By this weight all goods are sold, except those named under Troy Weight.

27$\frac{11}{32}$ Grains ..... 1 Dram	28 Pounds ..... 1 Quarter
16 Drams ..... 1 Ounce	4 Quarters, or 112 lbs.... } 1 Hundredwt.
16 Ounces ..... 1 Pound	20 Hundredwt.... 1 Ton.
14 Pounds ..... 1 Stone	

The Grain Avoirdupois, though never used, is the same as the Grain in Troy weight. 7000 Grains make the Avoirdupois Pound, and 5760 Grains the Troy Pound. Therefore the Troy Pound is less than the Avoirdupois Pound in the proportion of 14 to 17 nearly; but the Troy Ounce is greater than the Avoirdupois Ounce in the proportion of 79 to 72 nearly.

Apothecaries Fluid Measure.

60 Minims ♏ ..... 1 Fluid Drachm	ʒ
8 Fluid Drachms ..... 1 Ounce (Troy)	℥
16 Ounces (Troy)..... 1 Pint	O
8 Pints..... 1 Gallon	gall.

Imperial Measure of Capacity for ALL LIQUIDS.

5 Ounces Avoirdupois of water make 1 Gill

4 Gills.....	1 Pint =	34⅔ Cubic In. (nearly)
2 Pints	1 Quart =	69⅓ Cubic Inches
4 Quarts.....	1 Gallon =	277⅓ ditto

The Gallon must contain exactly 10 Pounds Avoirdupois of pure

water at a temperature of 62°, the barometer being at 30 inches. It is the standard unit of measure of capacity for liquids and dry goods of every description, and is $\frac{1}{4}$th larger than the Old Wine Measure, $\frac{1}{77}$nd larger than the Old Dry Measure, and $\frac{1}{35}$th less than the Old Ale Measure.
